

Google Play Store Publishing

13-Team App Submission & Play Console Checklist

Purpose: Collect the required information and assets from each team before publishing their application on Google Play.

1. Basic App Details

■	Team name / team number
■	Team members' names
■	App name (maximum 30 characters)
■	Default app language
■	App or Game
■	Free or Paid
■	App category
■	Tags, if applicable
■	Package name / Application ID
■	Contact email

2. Store Listing Details

■	Short description (maximum 80 characters)
■	Full description (maximum 4,000 characters)
■	High-quality app icon
■	Phone screenshots
■	Tablet screenshots, if applicable
■	Feature graphic, where required
■	Promotional video, if applicable
■	Developer/contact information

3. App Build & Technical Details

■	Final Android App Bundle (.aab)
■	Application/package ID matches the submitted app
■	Final production build tested
■	App launches and core features work correctly
■	No unnecessary test/demo data in the production build

4. Privacy & Data Safety

■	Privacy Policy URL
■	Does the app collect user data? — Yes / No
■	Does the app share user data? — Yes / No

■	Types of data collected
■	Purpose of data collection
■	Third-party SDKs/services used
■	Is data encrypted in transit?
■	Can users request deletion of their data?

5. App Content & Policy Declarations

■	Contains ads? — Yes / No
■	Target audience / age group
■	Content rating questionnaire information
■	App access requirements
■	Sensitive permissions used
■	Other applicable policy declarations

6. Login / Reviewer Access

■	Does the app require login? — Yes / No
■	Test username/email, if required
■	Test password, if required
■	OTP/PIN instructions, if required
■	Steps for the reviewer to access important features
■	Any special instructions or setup required for review

Important

The Data Safety, privacy, advertising, target-audience, content-rating, permissions, and reviewer-access information must accurately reflect the actual application. Do not guess these answers. Third-party SDKs and services used by the app may also affect the declarations.
